OBJECTIVE

As a graduate of The Flatiron School, I am looking for a
full-stack position that will use my skills in Ruby on Rails and/or JavaScript

APPLICATIONS BUILT

Ensemblify (ensemblify.com) - Rails app that pairs classical musicians with chamber ensembles
- Developed intelligent matching algorithms to return appropriate matches for musicians and groups
- Built notification system for musicians and groups of pending invitations or requests

Best Stop, the *Anti* Rest Stop (best-stop.herokuapp.com) - Rails app to provide alternatives to rest stop eateries
- Utilized Google Maps API to display a route from start to end and display calculated stopping point
- Integrated the Yelp API to present the user with a selection of restaurants near designated point

Petite Performer (petiteperformer.com) - Sinatra app that searches for childhood music classes in NYC
- Built search functionality to query database based on location, age, and availability

WEBSITES BUILT

valetanywhere.com   shapeup.com   gosmith.com   hippodrome.com
